

More solution  
for corn harvesting

**OROS CORNADO**

Corn header family

**AN ADAPTER**

IT CAN BE MOUNTED ON  
ANY COMBINE HARVESTER

FOR DEMANDING  
FARMERS!

- According to the results achieved in international field shows, these adapters have one of the best stalk chopper all over the world ➡ consistently spread chopped stalk that contains small particles
- Low fuel consumption compared to other adapters
- Faster harvesting speed: up to 10-12 km/h, depending on the type of the substance / corn
- Aluminium gear boxes, automotive industrial quality ➡ lightened construction
- Wear-resistant hard metal power-coated chopper knives
- Modern cardan drive  
➡ minimal maintenance demand

The position of  
**THE STALK CHOPPER**  
related to the chopping cylinder  
ensures **EXCELLENT STALK  
CHOPPING QUALITY EVEN AT  
HIGH HARVESTING SPEED.**

Advantages:

- Aluminium gear box
- Disengageable stalk chopper unit
- Long service life
- Optimum speed for perfect stalk chopping

# OROS CORNADO

Corn header family

## SNAPPING UNIT

## WITH KNIFE ROLL

- Four blade type
  - ➡ less stalks get into the combine
  - ➡ lower fuel consumption.
- For better putting down we have mounted a special rib on each blade to combine the advantages of the old rib-type and blade type systems.

It is proven by field measurements that the

Usage of wider, multi-road adapters on high performance new combines is more cost-effective during harvesting

**OUR 6-ROW AND 8-ROW FOLDABLE HEADERS**

**ARE SUITABLE FOR EUSTANDARD ROAD TRAFFIC!**

We recommend a transport vehicle for our foldable and fix framed headers larger than these sizes.
