

More solution  
for corn harvesting

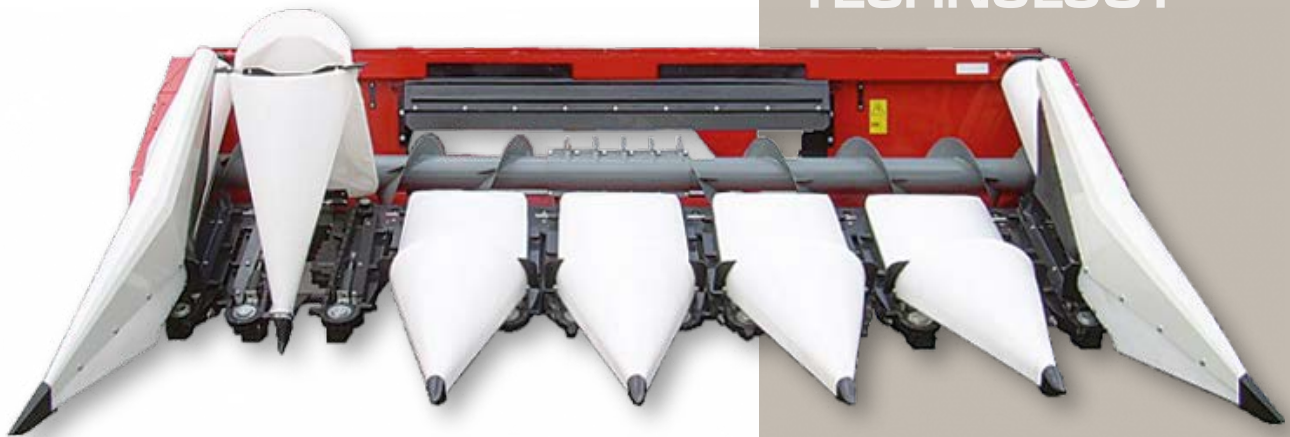

# OROS HSA

Corn header family

## TRADITION AND

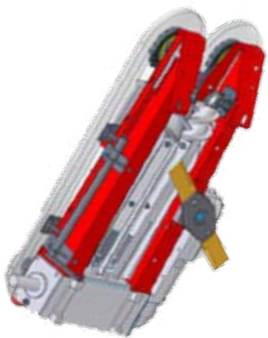

IT CAN BE MOUNTED ON  
ANY COMBINE HARVESTER

WELL-ESTABLISHED  
TECHNOLOGY

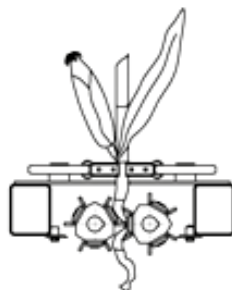

- More than 45-year experience in manufacturing
- Minimum daily maintenance
- Reliable operation, long service life
- The adjustment of the snapping plates (for cob's detachment): electrical, hydraulic solutions (adjustment from the cabin) manual solution also

### STALK CHOPPER

WE WERE THE FIRST COMPANY IN THE WORLD has developed the front (HSA type) stalk chopper for our OROS corn harvester headers. The chopping knives directly cut the stalks gripped by the snapping rolls. It causes average 7 cm long crushings.

### SNAPPING UNIT

### WITH FLUTED ROLLS:

Conventional design with 3 flutes on the snapping rolls.

Long life, replaceable ribs.
